

Eurotech has a successful track record in designing, delivering and supporting IT solutions to customers across EMEA for over 20 years

IT Solutions

- **Next-Generation Technologies** – Ranging from the Nutanix Virtual Compute Platform; Avere Cloud NAS; Tintri VM-aware storage; BlueBee High Performance Genomics solution; the latest IBM all-flash arrays and a range of Public, Private and Hybrid Cloud Services. Eurotech is constantly assessing the horizon of Information Technology development to advise our clients on the most appropriate technology strategy and investments.
- **High Performance Computing** – Our team has many years of experience in implementing, integrating and supporting high performance compute clusters with the associated network and storage infrastructure. We have a wide range of skills that can develop, implement and support seismic processing systems ranging from standalone Promax™ systems to clustered supercomputers upwards of 1000 nodes.
- **Storage** – We have the expertise and knowledge of designing, developing and implementing storage solutions to suit all environments and requirements from Departmental to Enterprise. We specialise in DAS, SAN & NAS from a wide range of partners, including IBM and Dell.
- **Tape Solutions** – We offer solutions ranging from manual load to robotic libraries in excess of 15,000 slots and we supply legacy as well as current tape formats. Our tape format knowledge spans 9 track to the future roadmap for 3592, LTO and LTF5.
- **Archive, Backup and Disaster Recovery** – Eurotech offers a range of enterprise solutions in this space, ranging from cloud archive services for compliance and capacity, to comprehensive on-premise or cloud-based backup and DR solutions.

IT Services

- **Professional Services** – Eurotech can offer a range of professional services to simplify your IT environment for operational excellence and help reduce costs, either on a full-time, part-time or project basis:
 - Specialist Consulting and Solution Design
 - Solution implementation
 - Systems assessment and Auditing
 - Full life cycle data management
- **Project Management Services** – In order to successfully deliver IT solutions to clients, Eurotech has standardised on a PRINCE2-based project management methodology and can deliver the appropriate project management skills to ensure that projects are delivered in time, on budget and to agreed quality standards.
- **Support Services** – Eurotech offers a range of post-sales support services and contracts, including:
 - Full Managed Service Contracts
 - Linux, UNIX and Windows Engineering monitoring & support
 - Application support: Exchange, SharePoint, Lotus and more
 - Database support: Oracle, MS SQL, Sybase, MySQL and others
 - Time Allocation Contracts (for Remote and On-site Support)
