

# Eurotech Tape Drive Information

3592

3590

3480, 3490

9 Track

LTO

DLT

DDS/DAT

Exabyte

There are five formats with different recording densities that yield different capacities per cartridge type:

### **Enterprise Format 1 (EFMT1)**

Used by the 3592 J1A tape drive, and the 3592 E05 Tape Drive in both native and J1A emulation mode.

This format records 512 tracks on 8 channels.

The 3592 E06 and 3592 E07 tape drive (with code level D3I3\_5CD or higher) reads data that is written in EFMT1 format but does not write in EFMT1.

### **Enterprise Format 2 (EFMT2)**

Used by the 3592 E05 tape drive, and the 3592 E06 Tape Drive.

This format records 896 tracks on 16 channels.

When the drive is operating on encrypted data at this density, the recording format is Enterprise Encrypted Format 2 (EEFMT2).

### **Enterprise Format 3 (EFMT3)**

Used by the 3592 E06 tape drive and the 3592 E07 Tape Drive.

This format records 1152 tracks on 16 channels.

When the drive is operating on encrypted data at this density, the recording format is Enterprise Encrypted Format 3 (EEFMT3).

### **Enterprise Format 4 (EFMT4)**

Used by the 3592 E07 tape drive.

This format records 1664 tracks on JB and JX cartridges and 2560 tracks on JC, JK, and JY cartridges on 32 channels.

When the drive is operating on encrypted data at this density, the recording format is Enterprise Encrypted Format 4 (EEFMT4).

### **Enterprise Format 5 (EFMT5)**

Used by the 3592 E08 tape drive.

This format records 5120 tracks on JC, JD, JK, JL, JY, and JZ cartridges on 32 channels.

When the drive is operating on encrypted data at this density, the recording format is Enterprise Encrypted Format 5 (EEFMT5).

Drive Mode Setting	Formats read	Format that is used when writing and cartridge is at BOT	Format that is used when writing and cartridge is not at BOT	Model type reported to host in response to Inquiry command
J1A	EFMT1	EFMT1	EFMT1	J1A
E05 - native	EFMT1 or EFMT2	EFMT1 or EFMT2	EFMT1 or EFMT2	E05
E05 - emulating J1A	EFMT1	EFMT1	EFMT1	J1A
E06/EU6	EFMT1, EFMT2, or EFMT3	EFMT2 or EFMT3	EFMT2 or EFMT3	E06
E07 with code level D313_5CD or higher	EFMT1, EFMT2, EFMT3, or EFMT4	EFMT3 or EFMT4	EFMT3 or EFMT4	E07
E08 with code level D314_460 or higher	EFMT4 or EFMT5	EFMT4 or EFMT5	EFMT4 or EFMT5	E08

Emulation is only available on some E05 tape drives and is not available on E06, EU6, E07, or E08

**The 3592 J1A tape drive** - Read and write in EFMT1 format only

**The 3592 E05 tape drive** - Read and write in EFMT1 and EFMT2 formats

**The 3592 E05 encryption-capable tape drive** - Read and write in EFMT1, EFMT2, and EEFMT2 formats

**The 3592 E06 tape drive** - Read EFMT1, EFMT2, EEFMT2, EFMT3, and EEFMT3 and write EFMT2, EEFMT2, EFMT3, and EEFMT3 formats

Operates in native mode only

**The 3592 E07 tape drive** - Read EFMT2, EEFMT2, EFMT3, EEFMT3, EFMT4, and EEFMT4 and write EFMT3, EEFMT3, EFMT4, and EEFMT4 formats

Read support for EFMT2 and EEFMT2 and write support for EFMT3 and EEFMT3 is provided only with MEDIA9 and MEDIA10

Support for EFMT4 and EEFMT4 is provided with MEDIA9, MEDIA10, MEDIA11, MEDIA12, and MEDIA13

Operates in native mode only

**The 3592 E08 tape drive** - Read and write in EFMT4 and EFMT5 formats

Operates in native mode only

### Supported Cartridge Types:

#### The 3592 E08 tape drive uses

The Advanced Type D read/write (type JD), the Advanced Type D WORM (type JZ) and the Advanced Type D economy (type JL) cartridges.

Both the type JD and JZ cartridges have a maximum capacity of 10TB (9313.23 GiB).

The Advanced Type D economy cartridges have a maximum capacity of 2TB (1862.65 GiB).

#### The 3592 E07 and E08 tape drives use

The Advanced Data (type JC) and Advanced WORM (type JY) cartridges with a maximum capacity of 4TB (3725.3 GiB) for E07 and 7TB (6519.26 GiB) for E08

The 3592 Advanced Economy (type JK) cartridge with a maximum capacity of 500GB (465.66 GiB) with EFMT4 format and 900GB (838.19 GiB) with EFMT5 format

#### The 3592 E07, E06 and E05 tape drives use

3592 Extended Data (type JB) and Extended WORM (type JX) with a maximum capacity of 1.6TB (1490.12 GiB) with EFMT4 format, 1TB (931.3 GiB) with EFMT3 format and 700 GB (651.93 GiB) with EFMT2 format

The 3592 E07 tape drive with code level D3I3\_5CD or higher

Can read format EFMT2 but does not write EFMT2 format.

Can read only cartridge types JJ and JR.

Can read only cartridge types JA and JW

#### The 3592 E06, E05, and J1A tape drives use

3592 Standard Data (type JA) and Standard WORM (type JW) cartridges with a maximum capacity of 640GB (596.04 GiB) with EFMT3 format, 500GB (465.66 GiB) with EFMT2 format and 300GB (279.39 GiB) with EFMT1 format

3592 Economy Data (type JJ) and Economy WORM (type JR) cartridges with a maximum capacity of 128GB (119.21 GiB) with EFMT3 format, 100GB (93.13 GiB) with EFMT2 format and 60GB (55.88 GiB) with EFMT1 format.

E08	Not supported	Not supported	Not supported	R/W *	R/W
* Cartridge types JB and JX only					

The 3592 tape drive automatically reformats media when the tape is written while positioned at beginning of tape (BOT), such as when the tape label is written, if the tape does not match the drive format. In such a case, the tape is reformatted to match the 3592 tape drive.

The manual reformat process varies by operating system but usually includes running a program to issue the Mode Select command.

**The 3592 J1A** Tape Drive (or the **E05 emulating the J1A**) can reformat an EFMT2 or EFMT3 tape to an EFMT1.

**The native 3592 E05** tape drive can reformat an EFMT1, EFMT3, or EFMT4 tape to EFMT2 and reformat an EFMT2 or EFMT3 tape to an EFMT1 when writing from beginning of tape (BOT).

**The 3592 E06** tape drive does not support emulation but can read tapes in EFMT1, EFMT2, and EFMT3 format, and write in EFMT2 and EFMT3 format.

**The 3592 E06** tape drive can reformat any EFMT1, EFMT2, EFMT3, and EFMT4 tape to EFMT3 format when writing from BOT.

**The 3592 E07** tape drive does not support emulation but can read tapes in EFMT1 with code level D3I3\_5CD or higher, EFMT2, EFMT3, or EFMT4 format and write in EFMT3 and EFMT4 format.

**The 3592 E07** tape drive can reformat any EFMT2 or EFMT3 tape to EFMT4 format when it writes from BOT.

**The 3592 E08** tape drive does not support emulation but can read tapes in EFMT3, EFMT4, or EFMT5, and write in EFMT4 and EFMT5 format.

**The 3592 E08** tape drive can reformat any EFMT3 or EFMT4 tape to EFMT5 format when it writes from BOT

## 9 Track Media Comparison (Page 2 of 3)

Working on a capacity of 200MB for a 3600ft (1100m) long 9 track tape written at 6250bpi.

The table below shows how many tapes it would take to fill alternative capacities and how high that pile of 9 track tapes (at 1/2in each) would be.

The height could be up to twice the figures below if the tape container is included.

Examples:

1GB would take 5 tapes at 1/2in making the stack of tapes 2.5in high ....

A 1TB disk would be the equivalent of 5,000 tapes forming a stack 208ft or 63.5m high!

9 Track media comparison					
	Size (B)	No of 9 track media	Metric height	Imperial height	Comment
Byte	1				One character
Kilobyte	10 <sup>3</sup>				
Megabyte	10 <sup>6</sup>				
1/2in tape drive	200M B	1	12.7 mm	1/2 inch	~4 encyclopaedias
Gigabyte	10 <sup>9</sup>	5	63.5 mm	2.5 inches	~10m of books on shelf
Terabyte	10 <sup>12</sup>	5,000	63.5 m	208 feet	~1000 copies of the Encyclopaedia Britannica
Petabyte	10 <sup>15</sup>	5,000,000	63.5 Km	39.5 miles	~20 million 4-door filing cabinets full of text
Exabyte	10 <sup>18</sup>	5,000,000,000	63,500 Km	39,500 miles	5 Exabytes - all of the words ever spoken by mankind?
Zettabyte	10 <sup>21</sup>	5,000,000,000,000	63,500,000 Km	39,500,000 miles	
Yottabyte	10 <sup>24</sup>	5,000,000,000,000,000	63,500,000,000 Km	39,500,000,000 miles	11 trillion years to download a Yottabyte ?
Brontobyte	10 <sup>27</sup>	5,000,000,000,000,000,000	63,500,000,000,000 Km	39,500,000,000,000 miles	
Geopbyte	10 <sup>30</sup>	5,000,000,000,000,000,000,000	63,500,000,000,000,000 Km	39,500,000,000,000,000 miles	Lost for words .....
