

Eurotech Norway is Our Enterprise Tape 'Centre of Excellence'

Eurotech is one of the leading enterprise tape centres in the world, servicing and supplying a range of the best tape drives in the market. We have vast experience with legacy drives with full tape repair service. This includes full robotic support including the latest libraries.

Eurotech Norway concentrates on IBM Magstar technologies for which we produce our own rackmount enclosures. Eurotech Norway has a very strong relationship with IBM and we are an IBM Premier Business Partner. We understand the 3592 drives from inception to the latest TS1150 and track the roadmap for this technology.

In conjunction with our strong vendor relationships, we can fully support you in any area of tape maintenance, support and supply. We hold exclusive agreements that will ensure your equipment is maintained at peak performance and has access to the latest firmware. Our tape service is complemented by our cartridge supply and labelling service.

In addition, we fully support the Eurotech portfolio of products and services, supplying the latest technologies, including IBM GSS high-throughput storage, Nutanix Virtual Compute Platform (Software Defined Storage), Avere Systems NAS optimisation, Convey Compute and our Cloud Services portfolio.

Our head office is based just outside of Oslo, which gives us reach across Scandinavia—We also have a satellite office in Bergen.
